

LEENA MALIK

Director | The Malik Developments Corporation (TMDC)

Leena Malik leads the Canadian operations of The Malik Developments Corporation, overseeing the full spectrum of the company's activities across Toronto and the Greater Toronto Area (GTA). From land acquisition and rezoning to servicing, construction, and sales, Leena ensures TMDC's projects are executed with precision and purpose. She plays a key role in aligning cross-functional teams to deliver not only beautiful homes but also vibrant, sustainable communities.

Specializing in ultra-luxury residential developments—often exceeding 30,000 square feet—Leena brings an acute eye for design and detail to every project. She is known for her ability to identify exactly what materials to source and from where, drawing from a deep network of European and international partners to curate refined, high-quality finishes tailored to each home.

Leena also helms the company's quality control and timely project delivery efforts, overseeing seamless property transfers and upholding TMDC's high standards across all developments—from bespoke luxury estates to upcoming urban condominiums. She is currently driving a strategic initiative focused on expanding TMDC's land portfolio and shaping the development blueprint for the next decade.

Prior to her work in real estate, Leena practiced corporate law in both Toronto and Oman, gaining invaluable expertise in regulatory structuring and high-level negotiations. She holds a degree from the University of Toronto, St. George, and brings both discipline and creativity to her leadership at TMDC.

Beyond the world of real estate, Leena is a passionate advocate for the arts and an active supporter of the Malik Family Foundation, where she contributes to programs focused on education and youth development. Deeply committed to community impact, she champions initiatives that support underrepresented voices in the cultural landscape while empowering the next generation to thrive.
